EDUCATION

Advanced Master's in Computer Science **September 2024 - July 2026**

University of Leicester – Leicester, UK

Concentrations: Computational Intelligence & Software Engineering, Big Data & Predictive Analytics, Cybersecurity Foundations, Cloud Computing & Automation, Service-Oriented Architectures

Relevant Coursework: Analysis & Design of Algorithms, Mobile & Web Application Development, Agile & Cloud Automation, Individual Industry Project

Bachelor's of Science of Computer Science (HONS) **September 2021 - May 2024**

University of West London, RAK Campus, UAE

Concentrations: Artificial Intelligence & Machine Learning, Databases & Data Analytics, Cyber Security, Theory of Computation, Human-Centred Computing

Relevant Coursework: Algorithms & Data Structures, Programming, Information Systems & Databases, Mobile & Web Application Development, Computer Architecture, Data Communications, Mathematics for Computing

EXPERIENCE

1. **Team Member, Welcome Break – Taco Bell** **May 2025 – Present**

   Leicester, England

- Collaborative Teamwork: Played a vital role within a fast-paced team, coordinating effectively with colleagues to ensure seamless operations and meet service targets during peak hours.
- Customer Service & Communication: Delivered professional service to a diverse customer base, utilizing active listening and empathy to resolve inquiries and enhance the customer experience. +1
- Adaptability & Time Management: Demonstrated strong reliability and the ability to prioritize tasks efficiently in a high-pressure environment, maintaining high standards of accuracy and performance.

2. **Junior IT Executive, Threads (Gems Foundation)** **Jul 2023 – Sep 2023**

   Dubai, UAE

   · Conducted technical fieldwork by visiting various schools to install accounting software and assess server connections.

   · Provided technical support and troubleshooting to end-users, delivering effective solutions to enhance system performance.

   · Strengthened technical skills and built strong client relationships within the educational community.

3. **Sales Representative, Threads Retail Store** **Jun 2022 – Sep 2022**
   Dubai, UAE
   · Enhanced interpersonal communication and customer relations skills through daily interaction with diverse customers.
   · Sharpened understanding of customer preferences and the importance of patience, empathy, and active listening.
   · Represented the brand professionally and effectively addressed customer needs.

PROJECTS

MCDM-Based Travel Recommender System | GitHub: projectlink

Tools Used / Project Stack:
Python, Streamlit, Pandas, Multi-Criteria Decision Making (TOPSIS, AHP), Data Analysis, Git
Brief Overview:
Developed a personalized travel recommendation system that ranks and suggests optimal destinations using Multi-Criteria Decision Making techniques. Implemented TOPSIS and AHP algorithms to evaluate destinations based on user-defined preferences such as budget, climate, safety, and attractions. Built an interactive Streamlit web interface to visualize recommendations and compare algorithm outcomes, enabling data-driven travel decisions. The project demonstrates strong analytical thinking, algorithm implementation, and practical application of decision-support systems.

TECHNICAL SKILLS

Languages: Python (Pandas, PySpark, NumPy, scikit-learn), Java, SQL, HTML, JavaScript. Big **Data & ML**: Apache Spark (PySpark), Gradient-Boosted Trees (GBT), K-Means Clustering, MCDM (TOPSIS, AHP), Computational Intelligence, Data Mining, Feature Engineering. Cloud & **Automation**: Agile Cloud Automation, Azure Data Factory, Power BI, Streamlit, Git. Analysis & **Tools:** Microsoft Excel, Jupyter Notebook, Plotly, Matplotlib. Software Design: Analysis & Design of Algorithms, Service-Oriented Architectures (SOA), Software Engineering Principles, Agile Methodologies. Databases: Data Modeling (EERD), SQL, DDL, DML, PL/SQL, Normalisation, Data Integrity and Quality. Security & Compliance: Foundations of Cybersecurity, RSA Cryptography, Digital Signatures, Authentication, GDPR, Data governance, Anonymisation.

SOFT SKILLS

Problem-Solving: Strong analytical and critical thinking skills for tackling complex challenges
Communication: Ability to explain technical concepts clearly to both technical and non-technical audiences
Collaboration: Experience working in cross-functional teams in Agile environments **Adaptability:** Quick learner with the ability to adjust to new technologies and environments **Attention to Detail:** Focus on precision and accuracy in coding, debugging, and data analysis **Time Management:** Ability to prioritise and meet deadlines in fast-paced settings
Leadership & Initiative: Experience proactively taking ownership of projects and contributing innovative ideas
